

Host the Manual on GitHub Pages

Permanent free hosting. Public URL. ~10 minutes, no terminal needed.

Step 1 — Create the repository

1. Go to github.com and sign in.
2. Click the "+" icon in the top-right corner → "New repository".
3. Repository name: `umpire-manual` (lowercase, no spaces).
4. Description (optional): "Little League Umpire Manual — Mobile Reader".
5. Visibility: choose Public. (Free GitHub Pages requires public.)
6. Leave "Add a README file" UNCHECKED. Skip the other options.
7. Click "Create repository".

Step 2 — Upload the manual files

1. On the new empty repository page, click the "uploading an existing file" link (or the "Add file → Upload files" button).
2. Unzip `umpire-manual-2026-v3.zip` on your computer first — you need the contents of the manual folder, not the zip itself.
3. Drag the CONTENTS of the manual folder (`index.html`, `data.js`, `pages/`, `icons/`, etc.) into the GitHub upload area. NOT the manual folder itself.
4. Wait for all 187 files to upload (about 1–2 minutes on a decent connection).
5. Scroll down. Commit message: "Initial upload". Click "Commit changes".

Step 3 — Turn on GitHub Pages

1. In the repository, click the Settings tab (top-right).
2. In the left sidebar, click Pages.
3. Under "Source", choose "Deploy from a branch".
4. Branch: `main`, folder: `/` (root). Click Save.
5. Wait ~1–2 minutes for the first build, then refresh the page.
6. You will see: "Your site is live at `https://YOUR-USERNAME.github.io/umpire-manual/`".
7. Tap that link to verify it loads.

Step 4 — Share with your crew

1. Copy the live URL (ends with `/umpire-manual/`).
2. Open `install-sop.txt`, replace `YOUR-URL-HERE.netlify.app` with your real URL.
3. Text or email the SOP to your crew. They follow the 6 steps to install it.
4. OPTIONAL: ask me to regenerate `install-sop.pdf` with your real URL baked in.

Updating the manual later

Go to the repo → "Add file → Upload files" again. New files replace old ones. Changes go live in ~1–2 minutes.
